changing the table

Capability Statement

Pluie™
Diaper Changing Tables

The world's first and only self-sanitizing diaper changing table, powered by a patented UV-C light system.

Pluie Diaper Changing Table Differentiators

UV-C Light
The patented UV-C light system placed behind a protection panel turns on when the table is closed to sanitize the changing surface. **UV-C light is known to kill 99.9% of germs, bacteria, and viruses including E. Coli, Influenza and Coronavirus.**

Plush Cushion
A soft space to place a child's bottom, keeping them cozy and comfortable. Cushion is water-resistant and leakproof.

Plenty of Space
A large changing area enhances the feeling of safety and security. And the extra space accommodate necessities like wipes and other items so they're always within reach.

Quick Install
Mounts easily to a wall with included brackets (similar to a TV mount). Installation is intuitive, quick and simple, and it requires minimal assembly.

Retractable Security Strap
Pluie's security strap retracts back into the table. This feature keeps the strap in the "clean zone" and reduces the risk of a broken strap.

Multipurpose Handles
Hang a diaper bag or purse on one of the multipurpose handles—instead of laying it on a restroom floor—which leaves your hands free to hold and change a child.

Pluie Diaper Changing Table Core Competencies

Clean, Safe, Comfortable

Not only are traditional changing tables sometimes unsanitary, they are uncomfortable and inconvenient. For decades caregivers have been changing their children in the car or returning home to avoid using the options available to them.

Reliable

Many restrooms including men's restrooms still do not have changing tables. Recent legislation across the United States mandates public changing tables available to both men and women. All public restrooms should have Pluie changing tables.

New and Fresh Aesthetic

Not everyone uses the changing table but everyone sees it. Businesses have spent time designing every detail of their property but the current changing tables have an outdated, antiquated look and feel. Pluie has a sleek, modern design which will look great in any restroom.

Cost-Efficient

Businesses are tripling budgetary spend on the post-Covid requirements for proper cleaning. Pluie's UV-C light handles the table sanitization, saving your business significant time and money.

Sustainable

An infant's skin is much thinner than an adult's skin, placing babies at higher risk for infection when in contact with dirty surfaces or harsh chemicals. With Pluie you can eliminate those harsh chemicals being used on surfaces where babies are most vulnerable.

Consistency

Proper cleaning is at the core of making customers feel safe. Implementing Pluie's patented UV-C technology into your cleaning protocols can help ensure consistency and drive traffic back to your door.

Past Performance

Parents & Caregivers Say:

100%
If Pluie was added to a favorite store/public location, parents' perception of the brand's feelings towards family would improve.

83%
If Pluie was available at a favorite store/public location, parents would likely spend more money at the location and tell their friends about the location.

90%
People believe it is the responsibility of the business to ensure a safe and comfortable environment for children and parents.

100%
People are sometimes, often or always going out in public with their children and 70% said it is somewhat or exclusively a need to take their children out in public.
